WOLZ

2013 - Christian Wolz: 25 Years of Vocal art The anniversary album „**WOLZ**”

In 25 years, the Berlin based vocal artist Christian Wolz has created over 30 solo works and released 14 CDs.

To mark this occasion, he has produced his anniversary album "WOLZ", this year.

The album will be published on the internet on all major music portals on 15. July 2013.

The anniversary album "Wolz" consists of 25 elements in which the essence of his career is concentrated. Wolz selected elements of all studio works from the past 25 years, re-recorded them and added new themes.

With the voice as a means of expression that is available to almost all people, Christian Wolz, with his wide vocal range, creates seemingly impossible sounds. In addition to his natural voice he uses electronics to bring out aspects of sound which usually remain inaudible.

Through the use of vocal samples from his own voice, that are synthetically manipulated and molded into new sounds, inner images, even entire movies that are as volatile as the short pieces of music themselves are created in the listener.

Wolz tells stories in fantasy languages, again and again to themes that seem strange. He reaches the heartstrings of everyone and still allows free rein to own associations. It is a journey into unknown worlds: sometimes we are surrounded in the outland, then again we plunge in shallow waters - only to be brought back down to earth. An interplay of turmoil and harmony, avantgarde and tradition. Just Wolz.
